Welcome to Vote Cast Documentation

What is Vote Cast?

Vote Cast is a web-based voting system designed to facilitate secure and transparent voting processes. Whether it's for elections, polls, or surveys, Vote Cast allows users to cast their votes easily while providing real-time analytics of results.

This documentation serves as a comprehensive guide to help you understand, install, and use Vote Cast efficiently.

KEY FEATURES

- ✓ Secure and anonymous voting
- ✓ Real-time vote count updates
- ✓ User authentication and session tracking
- ✓ Simple and intuitive user interface
- ✓ Automated Email Invitations to all registered users

GETTING STARTED

To start using Vote Cast, check out the **Installation Guide** for step-by-step instructions on setting it up.

For an overview of how Vote Cast works, visit the **Project Overview** section.

SOURCE CODE & CONTRIBUTIONS

Vote Cast is open-source! You can find the full codebase and contribute to the project on GitHub:
