Welcome to Vote Cast Documentation 🦋 What is Vote Cast? Vote Cast is a web-based voting system designed to facilitate secure and transparent voting processes. Whether it's for elections, polls, or surveys, Vote Cast allows users to cast their votes easily while providing real-time analytics of results.

This documentation serves as a comprehensive guide to help you understand, install, and use Vote Cast efficiently.

💎 Key Features

- ✓ Secure and anonymous voting.
- ✓ Real-time vote count updates.
- ✓ User authentication and session tracking.
- ✓ Simple and intuitive user interface.
- ✓ Automated Email Invitations to all registered users.

🔗 Getting Started To start using Vote Cast, check out the Installation Guide for step-by-step instructions on setting it up.

For an overview of how Vote Cast works, visit the Project Overview section.

📁 Source Code & Contributions Vote Cast is open-source! You can find the full codebase and contribute to the project on GitHub:
