Vote Cast Documentation

Project Structure

The *Vote Cast* project is structured into multiple Django apps, each responsible for specific functionality. Below is an overview of the key apps and their roles.

Main Apps

1. `main`

   - Handles the homepage and general static pages.

   - Manages site-wide settings.

2. `users`

   - Manages authentication (signup, login, logout).

   - Stores user profiles and permissions.

3. `voting_sessions`

   - Core functionality for creating and managing voting sessions.

   - Stores voting options and tracks votes.

4. `results`

   - Processes and displays voting results.

   - Future integration with Dash for visual analytics.

Additional Components

- `templates/`

Contains HTML templates for frontend rendering.

- `static/`

Includes CSS, JavaScript, and image assets.

- `media/`

Holds user-uploaded files (if applicable).

```
- config/
```

Global project settings and configurations.

This modular structure ensures maintainability and scalability for future enhancements.
